*Providing trust and certainty throughout the global supply chain*

ALFRED H KNIGHT

## AGRICULTURE

OFFER A WIDE RANGE OF SERVICES, THROUGHOUT THE AGRICULTURE SUPPLY CHAIN. FROM SEED AND CROP TO QUALITY AND QUANTITY VERIFICATIONS FOR TRADE AND COMPLIANCE.

Operating across a variety of commodity segments, providing clients with clear traceability and the highest level of quality control standards. Our approach allows us to tailor our services to suit your individual needs, providing customized solutions.

### EXPERTS YOU CAN TRUST

ALFRED H KNIGHT services and network ensures products and commodities are in contractual, food safety, social and environmental compliance.

We provide independent control and assurance, with a level of verification accepted by growers through to consumers, including trade finance and banking sectors.

### PROTECTING YOUR INVESTMENT

Our network of highly experienced inspectors and analytical laboratories operate at any point in your supply chain, providing quality and quantity verification through to license protection and sustainability assessments.

#### *Inspection Supervision*

Providing trade, contractual and quality management verification process through vessel, container, storage and processing plant analysis and inspection services.

Ensuring quality and quantity through international global trade recognised standards, applying product safety, compliance and traceability processes.

#### *Analytical*

Accuracy of results and fast reporting are at the forefront of our analytical service offering. Our network of global laboratories and on-site testing services ensures the supply chain is maintained through direct reporting and analytical expertise. Adding new innovative rapid testing technologies also provides clients with cost effective and accurate quality management solutions.

#### *Seed and Crop*

Providing Precision Agriculture and supply chain traceability services to the seed and crop industry, linking trade and consumer supply services to origin sustainability practices to accurately measure and record soil organic carbon initiatives as well as seed testing and field mapping services.

### *Audit and Certification*

Leveraging supply chain product expertise and monitoring implementation of both industry and customised audit standards, Alfred H Knight's network provides clients with a full range of product tracking services from Field through to finished product.

**OUR INSPECTORS WORK TO  
RECOGNISED GLOBAL STANDARDS  
AND FOLLOW STANDARD
